

Software to plan *transportation* and shipment

# TMS

## TRANSPORTATION MANAGEMENT SYSTEM

The **TMS EasyTrip** is the web-based solution of the **SMA.I.L.): SMART INTEGRATED LOGISTICS** platform for planning trips, certifying deliveries and controlling transportation costs.

### Operational Workflows

# TMS Benefits

## Costs Reduction

The **ARC Advisory Group** reports that companies can **save** an average of **7.2% on costs** by implementing a TMS.

**Reduce transportation planning and control time.**

**Reduce delivery errors and dispute costs.**

## Flexibility

A **new generation TMS** responsive to **change**.

**On-boarding** and key user **training** in a single day

## Better Organisation

A **single TMS platform** to effectively **plan, manage and control** complex operations: optimise trips, choose the best vehicles and routes, select the most convenient carrier fares.

## Transparency and Shareability

The TMS **shares information and data in real time** with other software (**WMS, ERP, etc.**) to improve company logistics and the efficiency of administrative and accounting processes.

## Even more

# sustainable transport

### CO<sub>2</sub> emissions reduction

Choosing faster routes, the least polluting means of transport, and calculating the carbon footprint reduces CO<sub>2</sub> emissions into the air.

### Carbon Footprint

Reduce your company's carbon footprint by calculating greenhouse gas emissions

### Digitalisation

Thanks to the digitisation of documents and digital signatures, it is possible to reduce the amount of paper.
